

**West Rifa'a Primary
Boys School**

17 - 19 February 2025

Location
West Rifa'a

School Type
Government

No. of Students
390

Grade Levels
1 - 5

Overall effectiveness

Inadequate with Satisfactory Features

Students' Academic
Achievement

Students' Personal
Development

Teaching, Learning
and Assessment

Leadership,
Management and
Governance

Review Summary

- The school provides a safe learning environment where students adhere to school rules and regulations, while receiving appropriate personal support.
- The school monitors student discipline, encourages participation in extra-curricular activities, supports their talents, and caters for students with special needs. In addition to having appropriate communication channels with parents.
- The school needs to improve its administrative processes, through focusing on teachers' professional development programmes and closely monitoring their performance in lessons to improve the quality of teaching, learning and assessment. Additionally raising students' academic achievement in most core subjects and supporting their academic progress, especially the low achieving students are further areas for improvement.
- The school will develop an Action Plan based on the review recommendations and will be scheduled for a monitoring visit.
