

# **Marking Report Summary**

## Mathematics Grade 9

**June 2025** 

### Introduction

The mathematics examination consists of one question paper with 40 multiple-choice questions that students are given 120 minutes to answer on a separate answer sheet. Each question includes a prompt, followed by four options, only one of which is the correct answer. Each question focuses on one specific skill within the following four main fields:

### Mathematics Fields

- Numbers and Algebra
- Geometry and Measurement
- Data Analysis and Probability

### **Performance Summary**

#### **Positive Areas**

- Students' acquisition of knowledge and concepts related to numbers and algebra.
- Students' acquisition of knowledge and concepts related to geometry and measurement.

#### **Areas for Improvement**

- Understanding and applying the knowledge and concepts related to data analysis and probability.
- The ability to apply and use the concepts and knowledge related to geometry and measurement and numbers and algebra in various contexts.

#### **Mathematics Skills**

- Mathematical Knowledge
- Using and Applying Mathematics

#### Recommendations

- Developing students' ability to handle questions requiring higher-order thinking skills, or problem solving skills, in all three fields of mathematics.
- Training students on questions that measure their skills and knowledge in the field of data analysis and probability, and using these skills in life situations.
